

Activate spamfilter

For activating our spamfilter you have to fill in this form. The spamfilter will block SPAM mail and is also connected to an fall-back system. Using this your mail always will be delivered. It's required that the domainname is registered at Digitalus Webhosting & Webdesign, the domainname is in our nameservers and the mail is being handled by Digitalus Webhosting & Webdesign.

For activating the spamfilter we charge a yearly fee of €12,00 (excl. 19% VAT) / hostingpackage.

domainname(s) to activate:
